Sustainable Management of California's Fire-Prone Landscapes: Using Grazing to Help Keep Communities Safe

CALIFORNIA
FIRE SCIENCE
CONSORTIUM

The California Range Management Advisory Committee, an advisory body to the California Natural Resources Agency, is co-hosting a virtual workshop with the California Fire Science Consortium to discuss the use of prescribed livestock grazing as a sustainable fuel reduction and environmental management tool.

Three separate workshops in November will be **from 10AM-12PM** followed by an optional virtual networking hour where participants can engage with each other and ask questions.

Wildland Fuels: A Primer for Concerned Citizens & Grazers

November 5th, 2020
