

Grazing Agreements on State Lands

Introduction to panel

- Why form a panel?
- Key purposes and desired outcomes

Today's Panel Members

- ▶ **Larry Ford, CRM, LD Ford Rangeland Conservation Science**
- ▶ **Katie Delbar, USDA, rancher**
- ▶ **Dr. Marc Horney, CRM, professor Cal Poly SLO**
- ▶ **Dr. Kristina Wolf, CRM, State BOF**
- ▶ **John Rocha and Jennifer Clause, Sacramento County Department of General Services (DGS)**
- ▶ **Clayton Koopman, CRM, rancher, SFPUC Rangeland Manager**
- ▶ **Laura Cockrell, California Department of Fish & Wildlife**

Core Question #1

- How can these discussions be translated into guidance for grazing management planning and effective grazing programs for use on state lands, and in particular, California Demonstration State Forests?

Core Question #2

- ▶ Why do some state agencies and NGOs exclude versus utilize livestock grazing?
- ▶ What are the policy histories for those agencies choosing to continue, exclude, or re-start grazing?
- ▶ What are the constraints that may exclude grazing?
 - ▶ Social
 - ▶ Economic
 - ▶ Environmental

Core Question #3

- ▶ **What are the main components of a grazing license, and what are some of the requirements of a grazing license?**
 - **in terms of limitations or expectations for compliance on the part of the lessee and lessor**
 - e.g., monitoring, liability, cost, responsibilities
 - e.g., outlook on length of leases being negotiable beyond 5 years?

Core Question #4

- **What topics should be covered in a grazing management plan (GMP) for public lands?**
 - What performance standards should be included?
 - Responsibilities for monitoring (e.g., agency, grazing lessee)?
 - Reasonable limits to labor costs and level of effort for an effective monitoring program?
 - priority variables to measure
 - level of “research” rigor
 - assuring the monitoring results in a report for adjustment of management decisions
 - What published science-based resources are available to guide development of a monitoring program?

Core Question #5

- ▶ How is a fair market value determined?

**What Other Question(s)
Should We Be Asking?**
