

Board of Forestry and Fire Protection Workshop

Changes to California's Defensible Space Codes: Implementing Zone Zero

May 4th, 2022 9:00 a.m. - 3:00 p.m.

Hybrid meeting at Resources Building Room 221, Sacramento

Conceptual illustration of the implementation of Zone Zero

Interested stakeholders are invited to a workshop to take part in the Board of Forestry and Fire Protection's development of the enabling regulations to modernize California's defensible space codes. Specifically, AB 3074 (2020) directed the Board to establish a 0-5 foot "ember resistant" zone around structures adding to the existing two-zone defensible space system that requires fuel and vegetation management out to 100 feet from the structure.

The event will include presentations on the history of California's defensible space policy development and the science behind the required change. Participants will be invited to provide feedback on conceptual proposals and offer suggestions for inclusion in the regulations.

Anyone interested in helping guide the development of the regulations is invited.

Preregistration is required by May 2nd.

To register visit <https://forms.office.com/g/B0tJc4wVSf> . The workshop will be in-person with an on-line option available. Please register and indicate how you will participate.
